

# Product & Service Guide

[rtaintl.com](http://rtaintl.com)

## Essential Services

### Precision Machining

Our Precision Machining Centre provides rapid response support for machined aluminium alloy components.

### Warehousing & Distribution

Managed Warehousing, including bonded warehousing in the UK with environmental controls and final mile logistics support.

### Assembly

Assembly services consolidate BoMs and supply chains while reducing FOD risks and end user processing times.

From the beginning, it has always been about appreciating how unique each customer is.

Robert A. Musumeci  
President

## PRODUCTS/SERVICES

### Hardware/COTS

Extensive range of quality aerospace hardware and standard COTS to imperial (e.g. AN, NASM, MS, BS) and metric (e.g. JIS, ISO, DIN, ES, LN) standards. Commercial grades and industry standard cross reference items available upon request.

### Formed Sheet Metal Components

Laser and wire EDM for accurate profiling of Aluminium (8mm), stainless steel (12mm), and mild steel (20mm). Fine tolerance forming capacity on multi-axis press brake CNC machines up to 3 metres. No MOQs and short lead times provide the ideal solution for prototyping, testing, aftermarket and unforeseen production requirements. LCC partners provide volume production support.

### Machined Alloy and Polymer Components

3, 4 and 5 axis milling, turning, and grinding capabilities for a wide range of aluminium, ferrous and non-ferrous alloys, as well as various plastics. No MOQs provide a solution for high mix, low volume demand such as NPI and Aftermarket. RTA's quick reaction service can meet the most urgent needs, while LCC partners provide ongoing production support.

### Managed Warehouse Services

3PL/4PL (Supplier and Customer Managed Inventory) with full lot trace preservation. Temperature and humidity controlled locations for stock requiring specialised storage environments. UK warehouse is AEO-F certified (CTPAT under UK-US MOU). Customs Warehousing available in the UK provides a tax- and duty-free storage solution for imported goods.

RTA has provided custom supply chain management solutions for aerospace and military customers for more than 25 years.

Established in the late 1980s in Stamford, Connecticut, RTA's growth has been led by ever evolving customer needs.

## HARMONISATION

Through-life support:  
from single piece, to serial production.

### Kitting Services

Supply chain consolidation, scalable to specific procurement and production requirements, our kitting service reduces customer procurement, receiving, internal storage and stock management time and cost. The scope covers RTA purchased items and SMI/CMI stock. Our UK customers can benefit from import tax and duty relief by utilising our IPR authorisation.

### Assembly Services

Part number consolidation further reduces customer purchasing and stock management time and costs, while also reducing cycle times on higher level parent assemblies and minimising FOD risks.

RTA's assembly service can combine parts from all value streams, including SMI/CMI to deliver a truly harmonised supply chain solution offering maximum benefits for customers. In the UK IPR can reduce or eliminate tax and duty on imported material and items used within assemblies for export.

RTA strives to add value and reduce cost.

From sourcing, warehousing, kitting and distribution of hardware, through to the provision of machined and formed components, lean production support and integration services.

## CUSTOMER EXPERIENCE

### Quality Assurance and Control

Our continued SC21 Gold recognition provides confidence in our ability to consistently provide world class quality performance. QMS certified to BSEN9100 and BSEN9120. FAI reporting conforms to AS9102.

### Distribution & Operations Support

Direct supply or working in partnership with other logistics providers, our global network ensures product delivery when and where it is needed. Split lots (with full lot trace preservation) on consignment stock, kanban management, line-side feed, and on-site stores provide an enhanced customer experience that delivers the complete production support service.
